

Jay Sharma

Your everyday tech companion

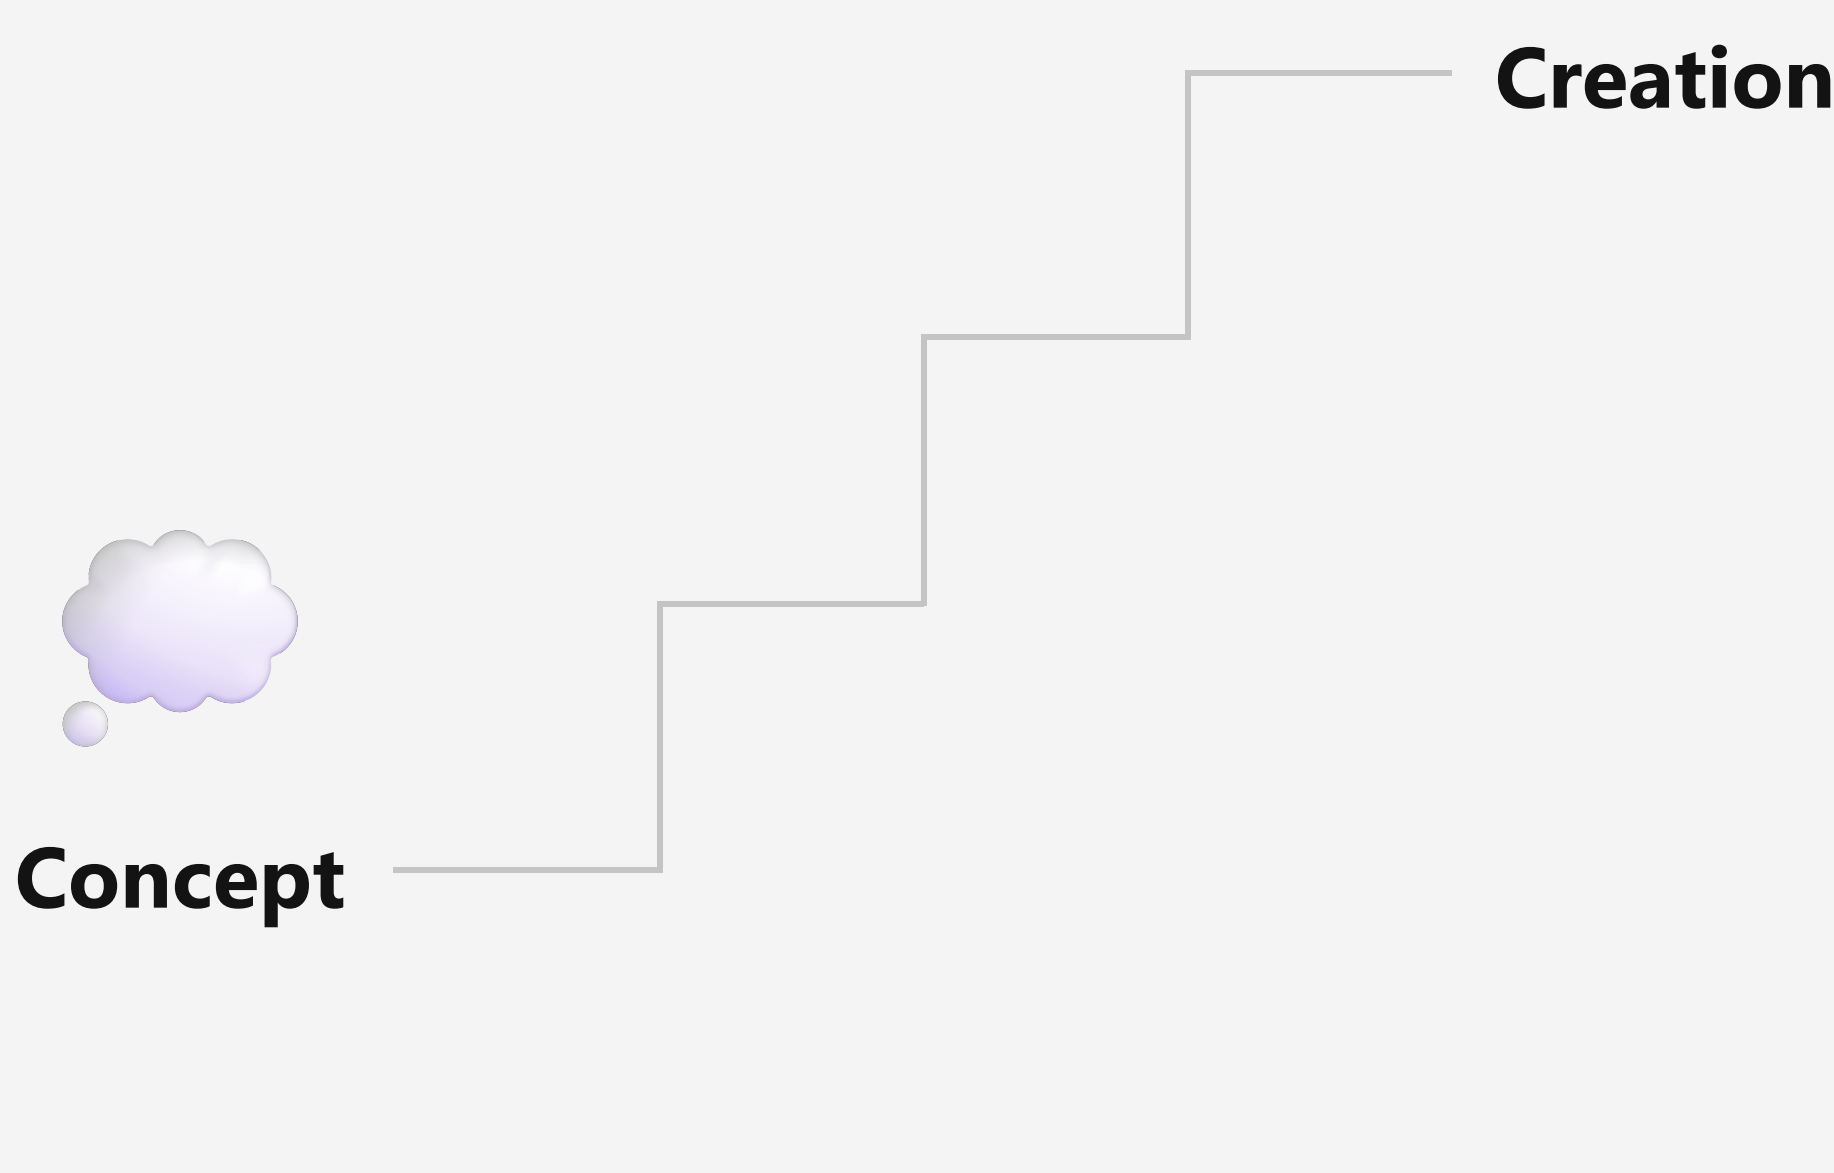

Email LinkedIn Portfolio

Hi, I'm Jay. I'm a Software Engineering student at McMaster University and a product-minded developer with experience across design and engineering. I enjoy solving problems with a human-centered approach, and have worked in cross-functional teams to deliver digital solutions using modern technologies.

Here's why you should hire me as a SWE Intern @ Microsoft.

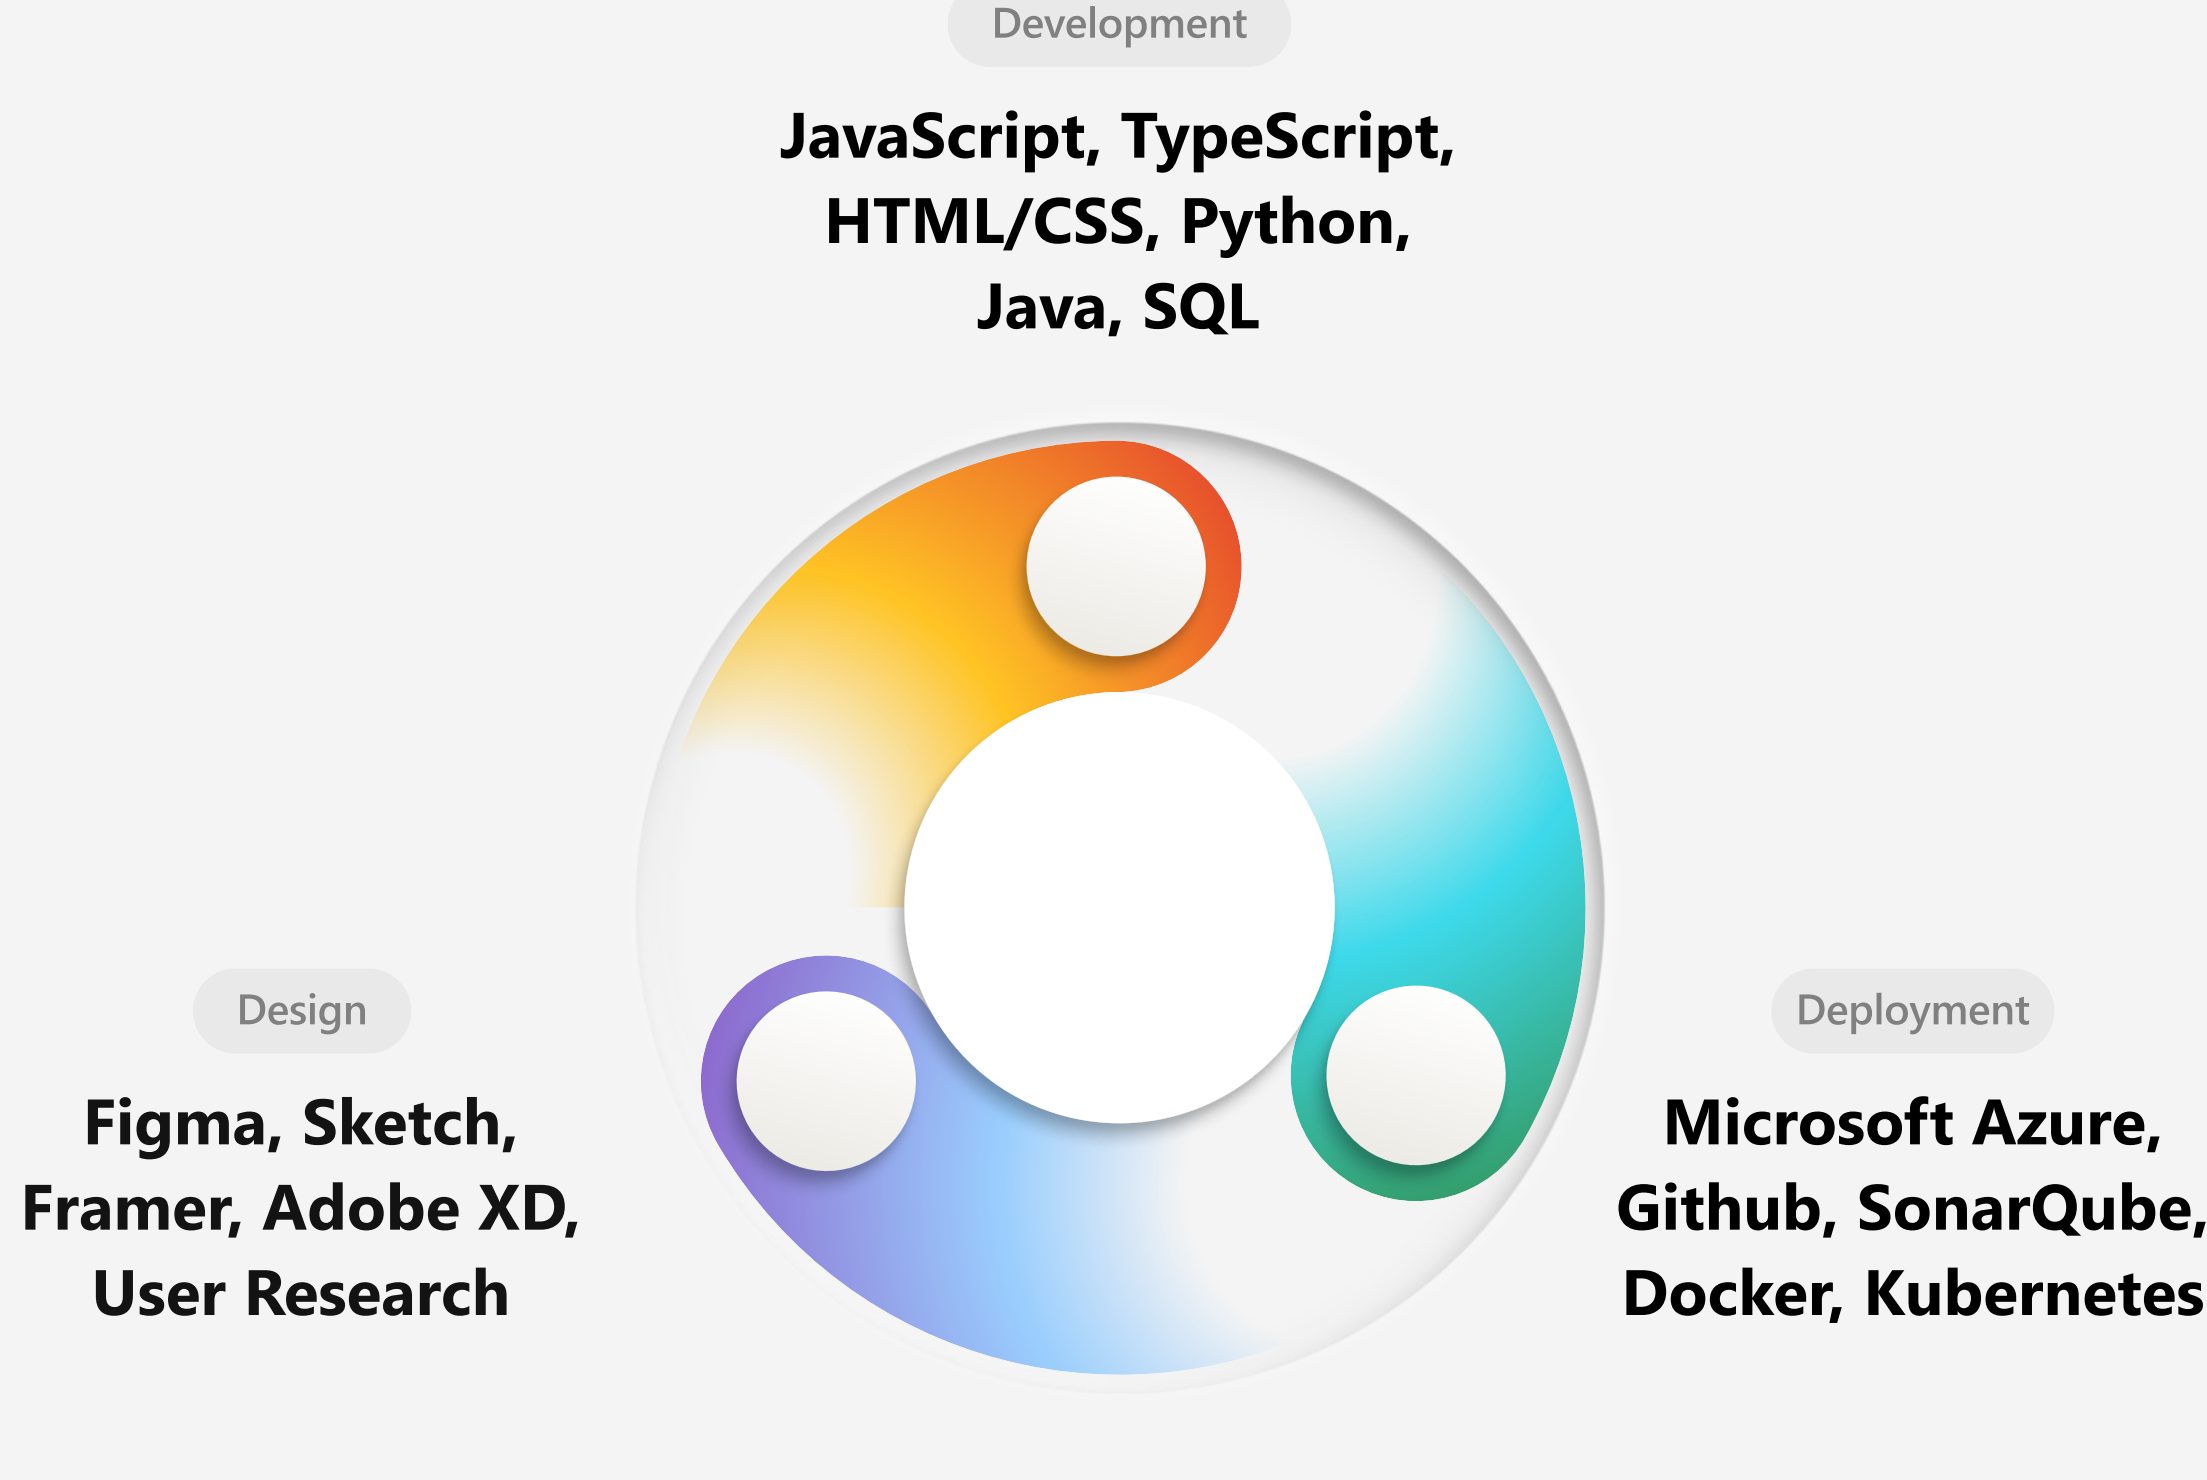

Bridging the gap between design and engineering.

With a knack for translating pixels to code, I seamlessly blend aesthetics with robust engineering to create user-centric digital experiences.

Designing, developing, and deploying end-to-end.

From crafting intuitive interfaces to writing efficient code, I leverage a modern tech stack to deploy ideas to life.

Building with a human centered focus.

By designing with inclusivity in mind, I strive to ensure that every user has an accessible and empowering experience, enabling everyone to do their best work.

Bringing a wealth of experience.

Leveraging my experience working with global Fortune companies like Deloitte, Accenture, and OMERS, I bring a proven track record of delivering high-impact digital solutions in fast-paced, dynamic environments.

DELOITTE SUMMER '22

Engineered a digital insurance solution winning \$50M in partnerships.

OMERS SUMMER '23

Digitized paper-based pension forms, simplifying admin work for 500,000+ members.

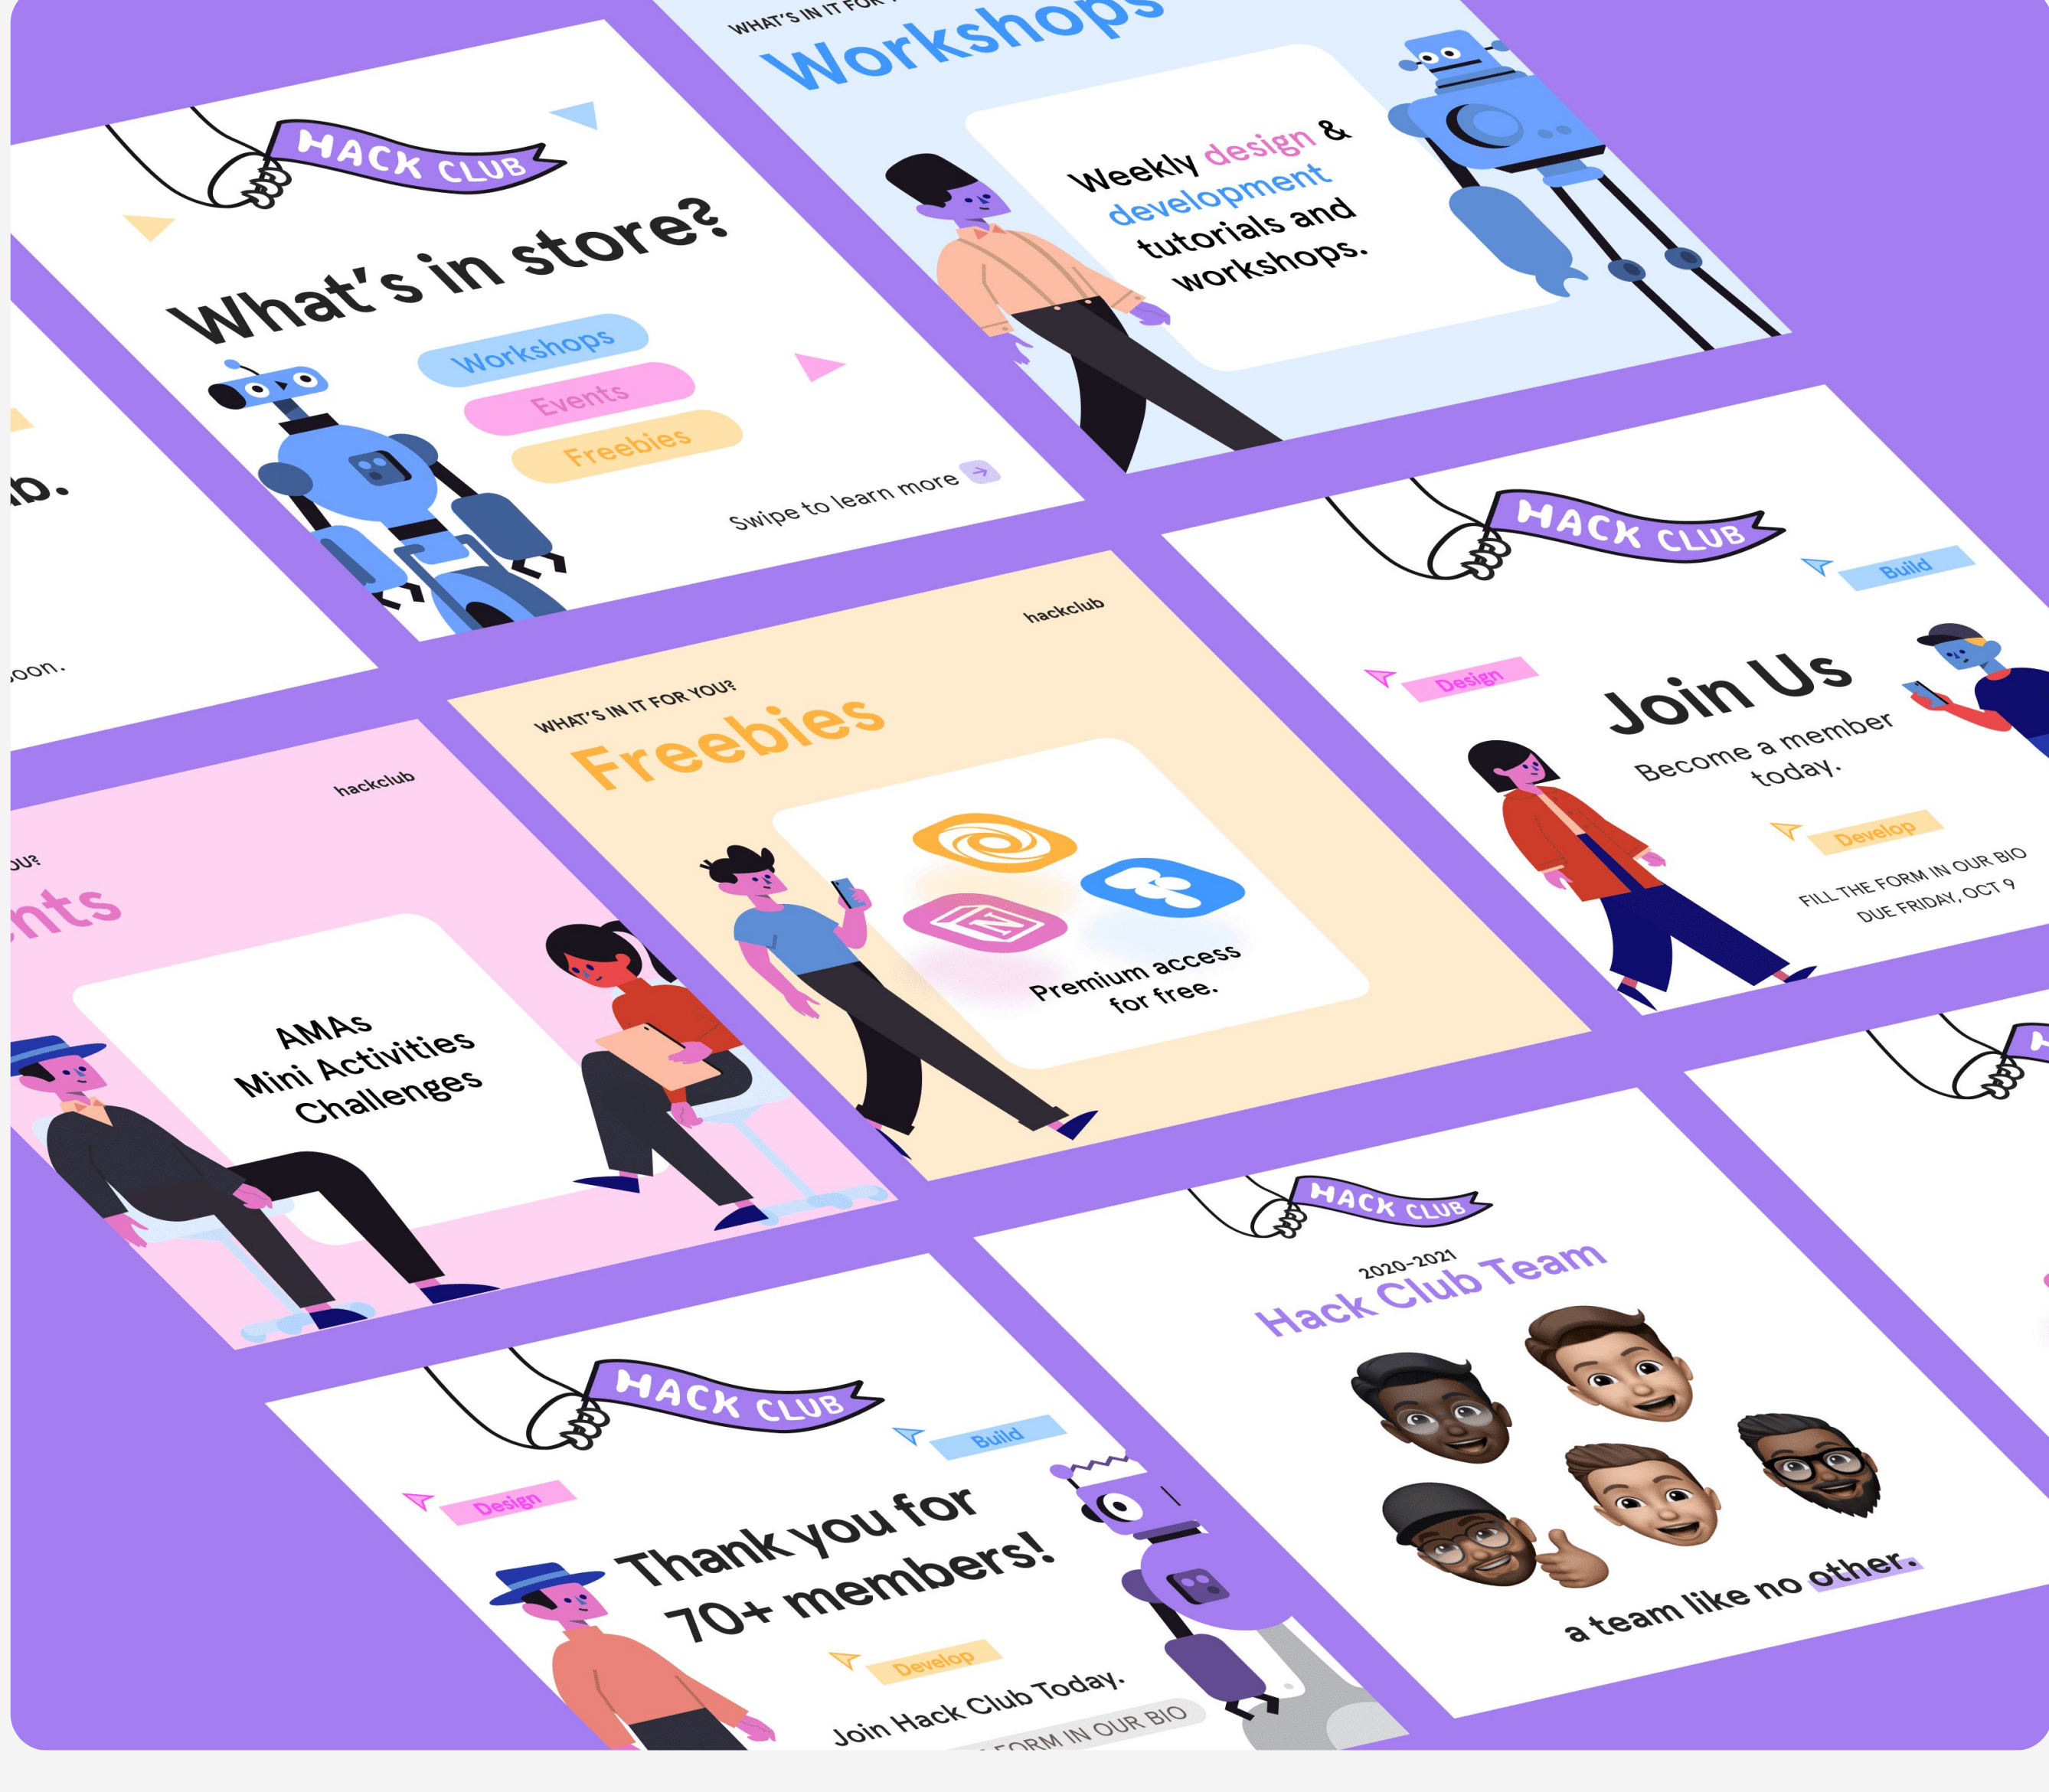

ACCENTURE SUMMER '24

Leveraging Data & AI to enhance analytics and reporting for a Canadian crown corporation.

Making a difference in the community.

Beyond my work, I harness my skills to drive meaningful change by engaging with various non-profit organizations like BAPS Charities, SPARK Hacks, and Canada Learning Code.

In the past, I also led a regional Hack Club where I collaborated with a team to empower over 100 designers and developers getting started in tech. Here's a peek at some of the content we produced.

Building projects for social good.

By competing in hackathons, I have pitched impactful solutions tackling global issues; winning awards such as the EDGE Entrepreneurship and Innovation Award and Finalist at the University of Waterloo Health Informatics Challenge.

Advocating for marginalized Indigenous communities.

Alleviating stress and anxiety during COVID-19.

If you made it this far, let's continue the conversation.

I am so happy you made it till the end, and I appreciate you taking the time to learn more about me. I am interested in opportunities on the UI, UX, and Web Development teams at Microsoft and would love to connect regarding any openings. Overall, I am here to learn and I look forward to the potential of joining Microsoft in the near future.

Sincerely,

Jay Sharma
